Personal Outfit Simulation Engine

Introduction

POSE or *Personal Outfit Simulation Engine* is a 3D-VR application that will help users visualize and try out clothes without going through the hassle of actually trying on clothes. It offers a variety of clothing items to choose, a range of colors and is available and accessible to all.

POSE is especially beneficial for individuals who face challenges with traditional shopping methods, such as people with disabilities. **POSE** aims to aid such problems by helping them mix and match, letting everyone freely express themselves through fashion. Its purpose is to break barriers and make stylish clothing accessible to all, ensuring that everyone has the opportunity to feel confident and comfortable in themselves.

Installation

POSE is exclusively for android devices only

For Android:

1. **Download the Application** - Download the .apk file from the link given below and click **install**
2. **Allow Permissions*** - (*Optional, depending on device*) Grant any required permissions for camera and storage access
3. **Launch the App** - Once POSE is installed, tap the icon on your home screen

Getting Started

1. Overview of the Interface
 - The main interface displays different 3D models around the room that may serve as your virtual avatar
 - Once clicked, you are able to see a panel at the bottom of the screen. This will enable you to select your top and bottom clothes.
 - Below the buttons to select your clothes, there are 3 buttons that are able to change the color variation of your clothes.

2. Customizing your virtual avatar

- Click on the 3D model around the room. You are able to choose between a man or a woman model
- Click on the button below that will cycle through the available clothes of the model

3. Adjusting Colors

- Below the selection of clothes, click on any of the color variations of the clothes to change the 3D model's outfit color.

Basic Controls

Explanation of key interactions, controls, or gestures.

1. **Selecting a Mannequin**

- Tap on a mannequin to select it as the one you want to dress

2. **Changing Outfits**

- Use the arrow buttons on the UI to cycle through different options for tops and bottoms.

3. **Changing Colors**

- Choose from preset color options to customize the selected mannequin's top and bottom wear. Simply tap on the desired color to apply it.

Troubleshooting:

List common issues and solutions.

Issue 1: The player occasionally gets teleported out of the scene.

Solution: Restart the app by closing it completely and reopening it.
